

# Here Comes the Night Time

Arcade Fire

When the sun goes down,  
When the sun goes down you head inside  
Because the lights don't work,  
Nothing works but you don't mind

Here comes the night time

The missionaries tell us we will be left behind  
Been left behind a thousand times, a thousand times  
If you want to be righteous, if you want to be righteous  
Get in line  
Here comes the night time

Here comes the night time  
Look out, here comes the night time  
Now here comes the night  
Here comes the night  
Look out here comes the night time

They say heaven's a place, yeah heaven's a place  
And they know where it is,  
But you know where it is?  
It's behind the gate, they won't let you in  
When they hear the beat coming from the street the lock the door,  
If there's no music up in heaven then what's it for?  
When I hear the beat, my spirit's on like a live wire  
A thousand horses running wild in a city on fire  
It starts in your feet, then it goes to your head  
And if you can feel it, then the rules are dead  
And if you're the judge, then what is our crime?  
Here comes the night time.

Now the preachers they talk  
[?]  
If you're looking for hell, just try looking inside

When you look in the sky, just try looking inside  
God knows what you might find  
Here comes the night time
