In This Town of Such Weather

Arcane Roots

You find me well and in good light After what has seemed forever While trees grow old from lasting, I am finding new things late To find her in this weather

I hope these leaves keep falling Down down down down I hope these leaves keep falling Down down down

So keep me holding all the night We have our scene together I can't keep holding back The bruising hastens hesitate And could not be without her

I hope these leaves keep falling
Down down down down
I hope these leaves keep falling
Down down down
I hope these leaves keep falling
Down down down down
I hope these leaves keep falling

I can't foresee anymore problems
Problems I can do without
This is the beginning of something
I can't foresee anymore problems
Problems I can do without
This is the beginning of something

I can't foresee anymore problems
Problems I can do without
This is the beginning of something
I can't foresee anymore problems
Problems I can do without
This is the beginning of something

I gave you all the things
That you threw away
Is it that you're so ungrateful
Or that you can't bear to say?

How does she make me Forget all I was before?! She came and saved me Under all these leaves that fell

I hope these leaves keep falling
Down down down down
I hope these leaves keep falling
Down down down
I hope these leaves keep falling
Down down down down
I hope these leaves keep falling

I can't foresee anymore problems
Problems I can do without
This is the beginning of something
I can't foresee anymore problems
Problems I can do without
This is the beginning of something
