

Sigh out, sign out
Your cursive moment
You wanted more
Well I guess you showed it
Now you sit with the other men
Now you sit and we'll just pretend

You've never fallen so hard right from the start
And now you're giving it up to be something you're not
It gets hard
Don't ever let go, the pieces aren't pretend
So if you're giving it up, let's be something we'll mend

So say it slow, tell me so I'm told
I cannot be the one, you know
We're holding on with teeth and lips we've numbed
And now we've reached the final low, alone

And like sums breathe life
You can feel the spark again
And there's nothing like breathing to begin

You've never fallen so hard right from the start
And now you've given it up to be something you want
It gets hard
I'll never let go, the pieces aren't pretend
So if we're giving it up, let's be something we're meant

So say it slow, tell me so I'm told
You're all that matters now I know
We're holding on our teeth and lips now numb
It does not matter in the cold

Darling, when you sleep the world will know
Darling, when you sleep the world is inanimate
Slowing down for you
But we can't stop moving round

So say it slow, tell me so I'm told
What it's like to go with
What it's like to go with
What it's like to go with
What it's like to go with

So say all you wanted to say
What you wanted to say
Now it's time to go home with
Now it's time to go home with

So say it slow, tell me so I'm told
What it's like to go home with
Now it's time to go home with
When it's time to go home with you
