

## Vows & Ceremony

Arcane Roots

Let's go, Let's go  
Our luck, it seems to ever flow, ever flow  
Let's never speak of it, my friend  
We'll never bend and break again

How long, how long  
Did we infer the typical, never go  
The days are getting long again  
And never will we see the end

So when we're buried in the ground  
And our lungs have turned to rust  
We can be all that we believe again

So let's go to the mountain  
(Like it's all we got, it's all we got)  
And leap right off the highest  
(Like it's all we got, it's all we got)  
We'll kick and scream and raise hell  
(Like it's all we got, it's all we got)  
'Cause you'll never ever take me

With every breath we stumble to a crawl  
Falling to my knees, I feel at home

So let's go to the mountain  
And leap right off the highest

So when they're creeping outside your door  
And you cannot see what is right  
I will be the sun at your side  
And we will see the world come to life  
We will see the world come to...

So let's go to the mountain  
(Like it's all we got, it's all we got)  
And leap right off the highest  
(Like it's all we got, it's all we got)  
We'll kick and scream and raise hell  
(Like it's all we got, it's all we got)  
'Cause you'll never ever take me

So when they're creeping outside your door  
And you cannot see what is right  
I will be the sun at your side  
And we will see the world come to life

When the lying hurts  
And the soldiers thirst  
We had a suitcase full of loss  
But no-one had a tongue

We were light

Now I saw you work  
In the liar's purse  
When no-one came along

We left the latch undone

We were light
