

Arrival

Arch of Hell

We are gonna arrive on this planet
So we will rule you all
We'll be gods you need
Can you feel what is real
Hide all your fears cause our blood is green
Hide all your fears cause our blood is green

Our mighty race has to got deep in your DNA
Praise us so we're deep in your DNA

We are aliens
From the outer space
We came from the stars
Don't you know, you fool

We arrived on this planet
So we can rule you all
We are gods you need
Can you feel what is real
Hide all your fears cause our blood is green
Hide all your fears cause our blood is green

For our sons and daughters
We're using our might for your days to be peaceful

We will smash you if you resist
But we promise to care
We will smash you if you resist
Cause we are conquerors

Our blood is not red like that pitiful of yours
We are divine gods upon you
Our blood is not red like that pitiful of yours

We are aliens
From the outer space
We came from the stars
Don't you know, you fool
We are aliens
From the outer space
We came from the stars
Don't you know, you fool
