

Go!
The cosmos is within us
Behold to the sky
The past and future are written there

You saw what was
And what will be
This whole thing is devastating
You cannot hide, you cannot run
Away from your memories

Behold to the sky, there is your past,
our origin is hidden there

Living truth is unbearable
How can you live with it
Elements of life and death
Are hidden in the stardust

We are all made of the stardust
We're all children of space
Descendants of the ancient race

You saw what was
And what will be
This whole thing is devastating
Living truth is unbearable
How can you live with it
You cannot hide, you cannot run
Away from your memories
Elements of life and death
Are hidden in the stardust

We are all made of the stardust
We're all the children of stars
Can you feel how the universe is calling
Voices from faraway, faraway, faraway

The cosmos is within us
You've read the sky
Have found the secret
Upon us all

Behold to the sky, there is your past
The origin is mystical

Accept your kind
Coming from space
Your creation is revealed
We are all made of stardust
