

Never Enough

Archers

I'll be direct
Since the point has been missed
Through the red on your lips
And the lies in your kiss
It won't convince
Since my mind has been made
And tonight is the same
What a waste of a bed frame

I only want you when
You've got something I need
Somehow it's better when the hate's
Mixed with Hennessy
You know we're not the same
Just the same disease
We always play the fool
When we're playing for keeps
It's time that I leave

Out of sight out of mind
On my temporary high
Hate myself in the morning
But tonight I'm fine
And we do it again
It never fucking ends

Out of sight and out of mind
I'm on my temporary high
I only want you when
You've got something I need
Somehow it's better when the hate's
Mixed with Hennessy
You know we're not the same
Just the same disease
We always play the fool
When we're playing for keeps

And I hate it
What we're doing lately
I don't want to say it to your face
Am I lovesick or sick of the love
What have we become
Enough is never enough
I know it's a crutch
I found comfort enough
At the bottom of a bottle
I think I'm sick
So fucking sick

I only want you when
You've got something I need
Somehow it's better when the hate's
Mixed with Hennessy
You know we're not the same
Just the same disease
We always play the fool
When we're playing for keeps

And I hate it
What we're doing lately
I don't want to say it to your face
Am I lovesick or sick of the love
What have we become
Enough is never enough
