

talk

Arden Jones

They used to hate
They say you're moving away
You're on a chase
And they all say 'settle down'
Ain't got the patience
I pick up the pace
This pen to paper

I just gotta tell you all the truth
Can't fuck with no one
Nothing new
Eyes watching everything you do
I tried I couldn't care less

Swear everybody
So worried 'bout me back home
Said they hope that I'm
Doing better now but they don't
They talk about what
They talk about like woah
They talk about what
They talk about like
It's all different now
I know time will never go back
But I'm better off
So I leave it all in the past
They talk about what
They talk about like
They talk about what
They talk about like

I been living like a mile a minute
Everybody got a lot to say
Every time you think it's over finished
I'ma be the one to find a way
Let me tell you how I'm moving now
Half a year I hit thirty states
I got people trying to bring me down
Roll another and I float away

I just gotta tell you all the truth
Can't fuck with no one
Nothing new
Eyes watching everything you do
I tried I couldn't care less

Swear everybody
So worried 'bout me back home
Said they hope that I'm
Doing better now but they don't
They talk about what
They talk about like woah
They talk about what
They talk about like
It's all different now
I know time will never go back
But I'm better off

So I leave it all in the past
They talk about what
They talk about like
They talk about what
They talk about like
