

# Floating World

## Area 11

God, send me a neon sign  
I need a friend 'cause I lost all mine  
In glowing streets from another time  
I know I'm here for something

Black suits flooding down the stairwell  
Gotta split from the drunken farewell  
"Thought you came all this way to raise hell?"  
I think you could be right

She pulled me in and out of trouble  
We know, oh, we know  
Like fireflies in the rain  
We're gonna struggle through the night

Let's find out what we've been missing  
'Cause baby we're half asleep  
It's funny but she's like, we've only just met but  
I'm three hundred stories deep  
Launch me to the Floating World, Ukiyo-e  
Before it gets too steep  
Sure you wanna know what you've been missing  
What we've been missing now, now, now

The party starts, then her fire show  
At her house in Tokyo  
Think we went too far, you know  
Think you could be right

She pulled me in and out of trouble  
We know, oh, we know  
Like fireflies in the rain  
We're gonna struggle through the night

Let's find out what we've been missing  
'Cause baby we're half asleep  
It's funny but she's like, we've only just met but  
I'm three hundred stories deep  
Launch me to the Floating World, Ukiyo-e  
Before it gets too steep  
Sure you wanna know what you've been missing  
What we've been missing now, now, now

Let's find out what we've been missing  
'Cause baby we're half asleep  
It's funny but she's like, we've only just met but  
We've only just met but, we've only just met

Let's find out what we've been missing  
'Cause baby we're half asleep  
It's funny but she's like, we've only just met but  
I'm three hundred stories deep  
Launch me to the Floating World, Ukiyo-e  
Before it gets too steep  
Sure you wanna know what you've been missing  
What we've been missing  
What we've been missing now
