

Maybe one day we'll come say hi
But right now is not the right time
We'll be on our spaceship, flying different places
Waiting for the day when you're done with all that fake shit
So many times we tried to help
Tried to save you from yourselves
We'll be on our spaceship flying different places
Hoping for the day when you overcome your hatred (Yeah)

We came to your planet, but we had to leave
Saw too many things we didn't wanna see
When you're all together, you look at your screens
What's your problem? How can you be so naive?
People killing others 'cause of their beliefs (Wow, wow)

We tried coming down, but we saw no light (Saw no light)
We like species who represent good vibes (That's what we like)
We fly over Earth and we say goodbye (Doei, doei)
In time, we hope you recognize what's right
Waiting, patient, til' the time is right for us to save it
Before you fade away

Maybe one day we'll come say hi
But right now is not the right time
We'll be on our spaceship, flying different places
Waiting for the day when you're done with all that fake shit
So many times we tried to help
Tried to save you from yourselves
We'll be on our spaceship flying different places
Hoping for the day when you overcome your hatred (Fuck, yeah)

We came to your planet, but we had to leave
Saw too many things we didn't wanna see
When you're all together, you look at your screens
What's your problem? How can you be so naive?
People killing others 'cause of their beliefs (How?)

We see people fighting, ayy
We see rockets flying, ayy
We see babies crying, ayy
Politicians lying, woah
Where is the unity? You're so divided, woah
Where is the love? We can't seem to find it

We tried to help, tried to save you from yourselves
We tried to help, tried to save you from yourselves

Switch

Maybe one day, we'll come say hi
But right now is not the right time
We'll be on our spaceship, flying different places
Waiting for the day when you're done with all that fake shit
