

## What If?

Arena

What if the world had been different that day?  
What if I'd chosen to stay?  
What if you'd stopped me from running away?  
There's that twenty twenty hindsight - that keep us sane  
I know what you'd say - sometimes other paths seem safer  
We just drifted away

Am I for real or just something you made?  
A man that your dreams would create  
You should have known that the fiction would fade  
There's that twenty twenty hindsight - that keep us sane  
I know what you'd say - we were simply an illusion  
We just drifted away

We could never have known  
Where our futures were guiding us  
We were never alone  
Our defences were hiding us  
Can you see what we could have been?  
Did you ever believe? Could you believe?

Should I have tried to become this ideal?  
Could I have made this fantasy real?  
I know what you'd say  
We were always too afraid  
We just drifted away

We could never have known  
Where our futures were guiding us  
We were never alone  
Our defences were hiding us  
Can you see what we could have been?  
Did you ever believe?  
Could you see there was truth in me?  
We were almost there...

We were never alone  
Our defenses were hiding us  
Can you see what we could have been?  
Did you ever believe?  
Could you see there was truth in me?  
We were almost there...
