

Bite Marks

Ari Abdul

Breathe in my innocence
Blow out my light
Sleep in my warm essence
Hold down your knife

You left your bite marks on my ribs
No bruises feel as good as this
God loves to watch her angels sin
I'm finding heaven in your skin

Tuck in your rosary
Say I'm your saint
Darling you torture me
Give me a taste

You left your bite marks on my ribs
No bruises feel as good as this
God loves to watch her angels sin
I'm finding heaven in your skin

You left your bite marks on my ribs
Just let it out what crawls within
You dig your fangs into my lips
I like the pain, the devils kiss

Te deseo, mi amor
You're everything that I adore
Y tu cuerpo es divino
Quédate mi cariño

You left your bite marks on my ribs
No bruises feel as good as this
God loves to watch her angels sin
I'm finding heaven in your skin

You left your bite marks on my ribs
Just let it out what crawls within
You dig your fangs into my lips
I like the pain, the devils kiss
