

Improvise

Ari Hest

Some people show only their softer sides
Skeletons there they would rather hide
You're not like them, that's time you just won't spend
I get the message that you send

But sometimes I wish you would loosen up
Maybe forgo that second coffee cup
I think you'd find, a day left undesigned
Is something you could get behind

What could come of certainty
The need to know eternally
Dare to improvise
Dare to improvise

You've got a grip that often makes me wince
Words hit like jabs maybe you could mince
However it goes, you're going with the flow
It's not an option to say no

What could come of certainty
The need to know eternally
Dare to improvise
Dare to improvise
Changes happen on the way
Some of them could make your day
Dare to improvise
Dare to improvise

You're gonna find, a day left undesigned
Is something you could get behind
Yeah something you could get behind

What could come of certainty
The need to know eternally
Dare to improvise
Dare to improvise
Changes happen on the way
Some of them could make your day
Dare to improvise
Dare to improvise
Dare to improvise
Dare to improvise
