

safety net

Ariana Grande

You know you're really something, yeah
How'd we get here so damn fast?
Only you can tell me that
Baby, 'cause you know I'm coming back

You're making me forget my past
Never thought I'd feel like that again
I came to peace with my path
Now you got me off track

I've never been this scared before
Feelings I just can't ignore
Don't know if I should fight or fly
But I don't mind

Tripping, falling with no safety net
Boy, it must be something that you said
Is it real this time, or is it in my head?
Got me tripping, falling with no safety net

Let your guard down, girl
You know we came too far now, girl
It's time for you to play your part now
You know we hit that jewelry store and we gon' ball out
Ups and downs, we had some fallouts
Put some ice on you, girl, let it thaw out
Girl, you're mine, it's safe to say
At the end of the day

I've never been this scared before
Feelings I just can't ignore
Don't know if I should fight or fly
But I don't mind

Tripping, falling with no safety net
Boy, it must be something that you said
Is it real this time, or is it in my head?
Got me tripping, falling with no safety net

Every time you feel some way, feel a way
Never let me run away, run away, my baby
Every time you feel some way, feel a way
Never let me run away, run away

(Girl, you got me)
Tripping, falling with no safety net
Boy, it must be something that you said
Is it real this time, or is it in my head?
Got me tripping, falling with no safety net
