

## MILES & MILES

Aries

Yeah, uh, uh  
Yeah, uh, uh

Divine forces, reaching in my aura  
Come and see the other side same time stay for ya'  
They don't know my high, wonder how I move into my eyes  
I can show you the vision in every step, it's bigger than your regrets  
So forget about that shit, move fourth not so stiff  
So, uh, fell in the wave I become a tsunami  
Build 'til I crash wonderin' where they got me  
These shape shifters ain't a safe place for us  
There are demons face covered in angel dust  
How many left? Who made it out?  
Let us span together, rejoice in stormy weather  
I've seen better days half of you don't get it  
When the rhyme is so raw leave ya' tummy upset  
Most you mother-  
fuckers would have never even guessed that's it's my time calling, 999  
You can't find something similar  
Why I've been bedroom-rapping till I'm out of this  
I need an antidote, not a big fan of those  
Rhymes like knives split your melon like a cantaloupe  
Fuck what you were handed  
Think your downfall is a highlight, 'til you look at it in hind sight  
I've got nothing to lose I'm all in  
Only way to grow now is to build from small wins

And it's my time, there's just one reason I'm away  
Travel miles and miles away just to find that better place, ok  
And they know nothing about my high, yeah  
If I fall to my death I hope I break the silence

I feel I've got a sixth sense activated  
Saying my name five times to bring out the haters  
Only got four members at the moment and I'm the fuckin' warden  
Tri-beam three eyes open  
You want peace with only two fingers up, get shut down no chance one never been enough so I  
Live like it's my last, wonder what I got right behind my mask  
Doomzilla being loud through the goddamn aux  
Ended up here out the Pandora's Box afraid that somebody could watch my move  
s, your words ain't true  
Views from the chamber don't give a fuck about a booth  
I don't trust everybody that's been rollin' with me  
I keep 'em right around my waist if you closest to me  
Do what I'm 'posed to, lately I've been talking to ghosts they tell me cut off anybody tryna hold you back

And it's my time, there's just one reason I'm away  
Travel miles and miles away just to find that better place, ok  
And they know nothing about my high, yeah  
If I fall to my death I hope I break the silence

There's just one reason  
I feel I've got a sixth sense activated  
Saying my name five times to bring out the haters  
Yeah, uh, uh

Yeah, uh, uh
