

You and Me

Arlo Guthrie

The sun is sinking down
I'm standing 'round my window
You say you're going away
But I believe in love

The power of love divine
Will surely shine you'll see
And guide us to where we ought to be
You and me

The moon is coming up
And I'm still here in prayer
You say you've had enough
And that you just don't care

But while the stars are coming out
And light shines from above
You tell me in my dreams
That you believe in love

The sun is coming up
A rainbow on my window
You say you're going away
And even though you do

The power of love divine
Will surely shine you'll see
And guide you home again to be...
You and me
