

## Firing Squad

### Arrows to Athens

This is our manifesto  
We've given all the best to you  
Like it was the least that we could ever do  
We're soaked in gasoline while you watched as everything just burned  
Letting your lighter do the dirty work  
You've better hold your ground  
The end is starting now  
So load your gun, a war is coming

We are all against the wall  
Won't be the ones that time forgot  
If it's our fate, we're not afraid  
Yeah we could face the firing squad

This is our revolution  
Too late for absolution now  
Nothing could ever put this fire out  
The calm before crescendo  
The quiet night before the storm  
Do you remember what you're fighting for?

We are all against the wall  
Won't be the ones that time forgot  
If it's our fate, we're not afraid  
Yeah we could face the firing squad

You've covered our eyes with blindfolds  
Light always finds it's way back in  
So go on and raise your rifle  
Fire fire fire!

Do you remember what your fighting for?

We are all against the wall  
Won't be the ones that time forgot  
We'll wear the stars like battle scars, so give us everything you've got  
If it's our fate, we're not afraid  
Yeah we could face the firing squad
