

Lightbringer

Art Nation

When the world spins round and round
And the tears still fall to the ground
If you're getting hurt, I'll take your pain
So you never need to face it again

You just need to look up to the sky
You'll find me where the stars align
So just don't be afraid, let it all go away

When all you feel is to embrace it all
When shadows tearing all apart
I'll be there, your shining star
So never think that you are wrong
Just look into the sky I'll be your light, your lightbringer
And light it all

Lightly, light, light, light
Be the light, be light, light
Lightly, light, lightbringer
Be the lightbringer
Lightly, light, lightbringer

Have you ever wished for it all
Someone holding you in their arms
And catching the fall, and tearing the walls
To make sure you don't get caught in the dark

You just need to look up to the sky
You'll find me where the stars align
So just don't be afraid, let it all go away

When all you feel is to embrace it all
When shadows tearing all apart
I'll be there, your shining star
So never think that you are wrong
Just look into the sky I'll be your light, your lightbringer
And light it all

Lightly, light, light, light
Be the light, be light, light
Lightly, light, lightbringer
Be the lightbringer
Lightly, light, lightbringer

When all you feel is to embrace it all
When shadows tearing all apart
I'll be there, your shining star
So never think that you are wrong
Just look into the sky I'll be your light, your lightbringer
And light it all

Lightly, light, light, light
Be the light, be light, light
Lightly, light, lightbringer
Be the lightbringer
Lightly, light, lightbringer

When all you feel is to embrace it all
When shadows tearing all apart
I'll be there, your shining star
So never think that you are wrong
Just look into the sky I'll be your light, your lightbringer
And light it all
