

Start A Fire

Art Nation

I know it all, know it all too well
Been here before, when you close the door
Every last farewell

And I don't care what they say, I won't let you fade away
I was yours from the start, no one's keeping us apart
Hear my voice echo in the dark

You're not alone, take control
Together we can start a fire
Next stop to the top
Baby let me take you higher

These words of mine
Letters in the sand
Our lives are more than what make today
Save me, baby, before it's too late
I hear your voice echo in the dark

You're not alone, take control
Together we can start a fire
Next stop to the top
Baby let me take you higher

I wanna show my love, leave it all behind
I wanna break free with you by my side

You're not alone, take control
Together we can start a fire
Next stop to the top
Baby let me take you higher
