Lighting up a cigarette as I watch you walk away  
And you don't wanna say some shit, and it's making me feel ashamed  
My lungs still ache

I was only tripping for a moment  
Now I wanna spend every moment with you  
You're the only one that I'll be holding  
And everybody else can take a walk  
You know, I swear

You will always gonna be my favourite  
You will always gonna make me stay bliss  
Even if I never make it famous  
Fuck being famous, cause' I swear  
You will always gonna be my favourite  
You will always gonna make me stay bliss  
Even if I never make it famous  
Fuck being famous, cause' I swear

If you ever leave...  
That be the end of me  
That be the start of my final scene  
And you can take a new man, and he ain't shit  
I don't even know him, and I hate him  
And I got that feeling, that she's faking it  
Somewhere, in California  
And that's not fake, cause' I swear

You will always gonna be my favourite  
You will always gonna make me stay bliss  
Even if I never make it famous  
Fuck being famous, cause' I swear  
You will always gonna be my favourite  
You will always gonna make me stay bliss  
Even if I never make it famous  
Fuck being famous, cause' I swear

I was only tripping for a moment  
Now I wanna spend every moment with you  
You're the only one that I'll be holding  
And everybody else can take a walk, you know  
I was only tripping for a moment  
I was only tripping for a moment, girl  
I was only tripping for a moment  
I was only tripping for a moment, girl

I swear  
You will always gonna be my favourite  
You will always gonna make me stay bliss  
Even if I never make it famous  
Fuck being famous, cause' I swear  
You will always gonna be my favourite  
You will always gonna make me stay bliss  
Even if I never make it famous  
Fuck being famous, cause' I swear
