

test drive

Artemas

(Oh) Yeah
(Oh) Ooh
(Oh)
(Oh)
(Test drive)

Put some faith in me and we'll get married for the night
Only I can feed the flame that's burnin' in your eyes
No one has to know the things that make you lose your mind
Put some faith in me, I'll take you for a test drive
Put some faith in me and we'll get married for the night
Only I can feed the flame that's burnin' in your eyes
No one has to know the things that make you lose your mind
Put some faith in me, I'll take you for a test drive

You look so good, now I'm paranoid
You lookin' for somebody that can fill the void
I can be that for you, I can keep touchin' you
I could avoid the truth (Oh)

I'll tease you 'til you beg for it
I'll never catch me beggin' for you
And I won't hear any blame
This is your bed that you made
Your bed where we're laying, shit

Put some faith in me and we'll get married for the night
Only I can feed the flame that's burnin' in your eyes
No one has to know the things that make you lose your mind
Put some faith in me, I'll take you for a test drive
Put some faith in me and we'll get married for the night
Only I can feed the flame that's burnin' in your eyes
No one has to know the things that make you lose your mind
Put some faith in me, I'll take you for a test drive

All your fantasies, all your little secrets
Baby, take the lead
I can make you scream all night long
And I won't hear any blame
This is your bed that you made
Your bed where we're laying

Put some faith in me and we'll get married for the night
Only I can feed the flame that's burnin' in your eyes
No one has to know the things that make you lose your mind
Put some faith in me, I'll take you for a test drive
Put some faith in me and we'll get married for the night
Only I can feed the flame that's burnin' in your eyes
No one has to know the things that make you lose your mind
Put some faith in me, I'll take you for a test drive

(Oh) Yeah—
