

It's All Relative

Arty

I wonder if there's any thought there dancing like a part of night

A futuristic civilization loving like we're out tonight

But on another planet out there somebody's gotta shine tonight

.. would start tonight, just like we are tonight!

(2x) :

It's one life, one love, and one universe

No matter what the distance between us is tonight

It's all relative, except love so'

I wonder if the aliens thought would see the Earth as Paradise
I wonder if they're about to come here and party with us tonight

Or would they shake their heads and tell us we ain't loving each other right!

And tell us there ain't no need to fight with each other tonight!

(2x) :

It's one life, one love, and one universe

No matter what the distance between us is tonight

It's all relative, except love

So let it shine!

Oh, it's all relative; it's all relative, all relative
Except love!

It's one life, one love, and one universe

No matter what the distance between us is tonight

It's all relative, except love

So let it shine tonight!

It's all relative; it's all relative, all relative, oh, oh

It's all relative, all relative, oh, oh

Except love!

It's all relative, it's all relative

Except love, love tonight!
