

# One Night Away

Asty

I thought I knew where love was  
I thought I left it in the past  
Just like a sunset fading  
Can't make the good things last

Ooh  
Maybe that was meant to be cause  
You  
You were worth the wait

I been searching for something  
Didn't know I would find it here  
When I thought I had nothing  
You were just one night away

I been searching for something  
Didn't know I would find it here  
When I couldn't see it coming  
You were just one night away  
You were just one night away  
One night away

Is it the stars aligning  
Together in this time and place  
We watched the sunset fading  
I'm dreaming wide awake

Ooh  
Maybe that was meant to be cause  
You  
You were worth the wait

I been searching for something  
Didn't know I would find it here  
When I thought I had nothing  
You were just one night away

I been searching for something  
Didn't know I would find it here  
When I couldn't see it coming  
You were just one night away  
You were just one night away  
One night away  
One night away  
You were just one night away

I been searching for something  
Didn't know I would find it here  
When I couldn't see it coming

You were just one night away  
One night away
