Perfect Strangers

Arty

Amber beams fall on me
As the sun goes asleep far from home
In your eyes, I can see
All the secrets we keep, let 'em go

Strip it down 'til we're naked
When we dance with the flame, yeah
Wash our worries away 'cause
All I know is we

Don't have to be perfect, perfect strangers
And I know after all this we won't be strangers
We're all coming from a different place
But these lights, they shine on us the same
Don't have to be perfect, perfect strangers

(Don't have to be)
Perfect strangers

Think there's something we're missing
Keep swimming and fighting the tide
I don't know where we're going
But we got this moment tonight

Strip it down 'til we're naked
When we dance with the flame, yeah
Wash our worries away 'cause
All I know is we

Don't have to be perfect, perfect strangers
And I know after all this we won't be strangers
We're all coming from a different place
But these lights, they shine on us the same
Don't have to be perfect, perfect strangers
Don't have to be perfect

(Don't have to be)
Perfect strangers
Perfect strangers

We're all coming from a different place
But these lights, they shine on us the same
Don't have to be perfect, perfect strangers
