

Some days it's hard to make it
But I know we'll make it through
These winds are always changing
But I'm holding on to you

I know that there are ups and downs
It's hard to stand and face it
As long as we're together now
The moment's never wasted

Some love was made for the daylight
Some love was made just for midnight
Our hearts will fade into black skies
Then we'll come back to life in the sunrise
Hello can turn into goodbye
But you know we're still on the same side
Our hearts will fade into black skies
Then we'll come back to life in the sunrise

Then we'll come back to life in the sunrise

Sometimes it's like a rainstorm
All our problems pouring down
But I'm not running from the real thing
This feeling we found

I know that there are ups and downs
It's hard to stand and face it
As long as we're together now
The moment's never wasted

Some love was made for the daylight
Some love was made just for midnight
Our hearts will fade into black skies
Then we'll come back to life in the sunrise
Hello will turn into goodbye
But you know we're still on the same side
Our hearts will fade into black skies
Then we'll come back to life in the sunrise

Some love was made for the daylight
Some love was made just for midnight
Our hearts will fade into black skies
Then we'll come back to life in the sunrise
