

# Hostage

ARZ

I'm right outside of your house with flowers  
Tryna get leverage my fault  
2 hands on me on arrival  
2 things don't violate or move entitled  
If you're Pisces girl I can't like you  
You don't look like the girl I'd lie to  
Eye contact by the Eiffel, Eiffel  
Telling this girl how I feel

Girl let's go to the tower spot  
I got more pain before the album comes  
And you know I ain't much of drinker  
But after the club smoke all night long  
You in that dress that's all I want  
Fucking with you is like all inclusive  
We by the coast and don't watch the cost

Cuz you're what I need  
When you was lonely I was the hostage

And I think it often  
The first night we met cause so much problems

Yea, look  
The first night was a lil bit dangerous  
The first night you was lil bit nervous  
The first night you said I smell amazing  
The first night I said you look perfect  
The first night we sat at the table  
I thought could I be with her and see it working  
But last night was way more different  
I want that first night version

I didn't wanna say it but you look better in person  
She put on worth it by thugga no doubt this girl's worth it  
She throw it back but man haffa earn it  
I got chocolates and flowers, you deserve it  
She's down to earth, I'm closing curtains

You're what I need  
When you was lonely I was the hostage

And I think it often  
The first night we met cause so much-
