

## Alive

### As December Falls

Come here and don't say never cause that's a real long time  
I've been asking around and tryna find a way to see my sign  
It's not long till you're meant to be here but you won't show u  
p I know  
That you're mad at me and our history says take it slow

I'll wait while the sun goes down and leaves this town and enca  
ses me in the blackness  
In the dark where all the bad thoughts come

Alive, alive, alive, alive, alive  
I just wanna be alone with you tonight  
To save me from myself  
You know you're something else  
You make me feel alive

Find me I'll be the one with glitter on my eyes  
You fill me up with hope then leave and act surprised  
I don't feel great, I just wanted you to stay  
(Please stay)

I'll wait while the sun goes down and leaves this town and enca  
ses me in the blackness  
In the dark where all the bad thoughts come

Alive, alive, alive, alive, alive  
I just wanna be alone with you tonight  
To save me from myself  
You know you're something else  
You make me feel alive

Alive, alive, alive, alive, alive  
I just wanna be alone with you tonight

Alive, alive, alive, alive, alive  
I just wanna feel something is that alright?  
To save me from myself  
You know you're something else  
You make me feel alive

Alive, alive, alive, alive, alive  
I just wanna be alone with you tonight
