

For The Plot

As December Falls

You told your friends that I'm insane
So then I slept with your best mate
You told me that it hurt a lot
I said I did it for the plot

You like to text when you're alone
So I blocked your number from my phone
And yet those walls were not enough
Who sends a fucking email

I'm sweet like honey but I sting like a bee
Let's see which side you get when you try to fuck with me

I'm better so much better
I'm better without you
I never want forever
With a guy like you

I'm better so much better
I'm better without you
I never want forever
If this is what you do
If this is what you do

You're not the only one with baggage
It's like you speak another language
Only I can hear that makes me think you're so sincere

I'm not an object you possess
Although I know that you're obsessed
With me and everything
I do I say I wear I think

I'm sweet like honey but I sting like a bee
Let's see which side you get when you try to fuck with me

I'm better so much better
I'm better without you
I never want forever
With a guy like you

I'm better so much better
I'm better without you
I never want forever
If this is what you do
If this is what you do

Thank goodness for my best friends
Who needs you when I have them
We'll keep talking again and again
About you and your better best friend

I'm better so much better
I'm better without you
I never want forever
With a guy like you

I'm better so much better
I'm better without you
I never want forever
If this is what you do

Thank goodness for my best friends
Who needs you when I have them
We'll keep talking again and again
About you and your better best friend

I'm better without you
