

Happier.

As December Falls

I'm always sick and I'm always tired
Steady life is my excuse
Nothing matters when you're down
And there's nothing gently nudging you

Any moment I hope I'll see
That we should all be

Happier
We should all be, happier

We should all be

Taking it all taking it now
Take what you need before it all goes down
And say what you want, say what you will
Nothing will change if you leave it still

Don't let it go

We should all be happier
