

Map & Compass

As It Is

If you should leave me you'd need only look as far
As every other man exasperated fed up with where they are
But map and compass in my hand I'll navigate my way home
And if all goes right this'll be the end of sleepless nights

With my headphones on, same damn song
Playing on repeat the whole night long
Clean slate, new fate seems daunting
With my headphones on, and the same damn song
Playing on repeat the whole night long
And now nothing can stop me

Your definition misconstrued
Don't wanna carry on this road alone or go on one soul edge
Take one step back onto the right path here, you watch me as I
try
A restless night is just a lie

My future self is on the phone I'll have to see this one through
And if all goes right this'll be the end of sleepless nights

With my headphones on, same damn song
Playing on repeat the whole night long
Clean slate, new fate seems daunting
With my headphones on, and the same damn song
Playing on repeat the whole night long
And now nothing can stop me

I let myself sink in too low
Spread out, got comfortable in a world
That looked convincing
Just do it on my own
Someone else can play that part
Now I've moved on to better things
To the things I may

With map and compass in my hand I'll navigate my way home
And if all goes right this'll be the end of sleepless nights

With my headphones on, same damn song
Playing on repeat the whole night long
Clean slate, new fate seems daunting
With my headphones on, and the same damn song
Playing on repeat the whole night long
And now nothing can stop me
