

## Shine Your Light

Aşa

What's on your mind child?  
Tell me all your troubles  
What's on your mind child?  
I'll help you lift your worries  
Share with me your secret problems  
Maybe I can help you solve them  
Time child  
Is all you need  
And if you wait a while child  
You'll find that you'll be okay  
I only know of one solution  
You and only you can do it

Shine your lights  
Don't let nobody tell you  
You can't shine your light  
Go out enter the world  
And do just what you like

What's on your mind now  
You see you're not so different  
So don't bail out  
No excuses, no defence  
Say it like you really mean it  
Everything you say believe it  
Oh yeah!  
After the dawn comes the light  
And you know nobody can tell you no more  
Hallelujah, you believe it  
I can see that you can do it

Shine your lights now  
Don't be afraid  
Don't be afraid  
No room, no room, no room for fear now  
Oh uh, yeah, yeah  
Get up, get up, get up, get up.

Go out, enter the world and show yourself  
Get up, get up, get up, get up, get up, oh oh.
