

## Ad Astra

Ash

Take me up to the stars  
We will learn who we are  
See the earth from above  
We'll be falling in love

Reaching dizzying heights  
Going faster than light  
On the wings of a prayer  
Where we go, I don't care, no!

Calling ground control, we're on a telepathic flight  
At zero hour our love will send us soaring through the sky  
And often I have wondered on that journey will we change?  
And if we ever come back, will we ever be the same?

It's a beautiful world  
That we're leaving behind  
Let's get lost in the stars  
Who knows what we will find, yeah  
Oh whoa

Calling ground control, we're on a telepathic flight  
At zero hour our love will send us soaring through the sky  
And often I have wondered on that journey will we change?  
And if we ever come back will we ever be the same?

Will you come follow me? (Will you follow your dreams?)  
To remote galaxies  
To Elysian heights  
We will find paradise
