

## Please Let That Be You

Ash

Lost out in the machinery  
Lifeless, slow and cold

Alone at home, alone too long  
Walk around the complex  
No visitors, no oxygen  
Just me, no movement

Please let that be you  
Knocking on my door so loud just like you do  
Bring in a message or two  
You know you are my fate and I love you

Empty, everything's technical  
Sterile, and endless  
Inside, a malfunction  
Observe and obsess

Please let that be you  
Ringing my phone right now like I wish you would do  
Call in with some good news  
You know you are my fate and I love you

You are my fate and I love you  
Stand by my side, always be true  
You are my fate and I love you  
I'll raise my right hand and swear it's true  
You are my fate  
You are my fate  
You are my fate  
You are my fate

Please let that be you  
Singing my song so nice sounding like you do  
Just humming along to your tune  
You know you are my fate and I love you
