## **Submission**

Sink into warm flesh I want to taste your skin Want to see you undressed And see you shake your thing You're bound and helpless And burning from within There for the taking I want to hear you sing

You turn me on, You cut me with your tongue You take it all on, submission You turn me on, You cut me with your tongue You take it all on, submission

There's nothing I won't do Even if it's wrong To please you That's where I'm coming from You warp my senses You're coming on so strong I gotta go down I gotta get it on

You turn me on, You cut me with your tongue You take it all on, submission You turn me on, You cut me with your tongue You take it all on, submission

Sink into warm flesh You got me in a daze You give me fever You hold me in your sway You're my addiction For you I'd take the pain Feel the friction And take it all the way

You turn me on, You cut me with your tongue You take it all on, submission You turn me on, You cut me with your tongue You take it all on, submission You cut me with your tongue You take it all on, submission You cut me with your tongue You cut me with your tongue You take it all on, submission
