

## Figured Out

Ashe

I play with all my calluses  
It's just my latest nervous tick  
Compare my life to all my friends  
It don't hold up like I wish it did

Got something in my contact lens  
It might be making my eyes twitch  
When I feel like I'm not enough  
Looking around I wonder who does

Everybody else gotta figure out  
Does anybody else deal with any doubt

I can't help, I can't help it  
It's all I think about how  
Does everybody else gotta figure out  
Except me

I hold my breath subconsciously  
I hope this bed won't swallow me  
I tell myself it gets better but  
Looking around I wonder who does

Everybody else gotta figure out  
Does anybody else deal with any doubt

I can't help, I can't help it  
It's all I think about how  
Does everybody else gotta figure out  
Except me

Except me

I can't help, I can't help it  
It's all I think about how  
Does everybody else gotta figure out  
Except me
