

Every Night

Asher Monroe

I, I'm thinking this might be a sign
I think of you all of the time
I'm thinking of making you mine

I, I can tell by the look in your eyes
I know that your body don't lie
The way that you move against mine

You know I want to love you
You know I need to love you
I want you by my side every night
Girl I know you want me
The way your back upon me
I'll make you satisfied every night
Every night, every night, e-e-every night

I, I'm keeping my eye on the prize
The way that you're dancing tonight
Feeling my pulse out to rise

You know I want to love you
You know I need to love you
I want you by my side every night
Girl I know you want me
The way your back upon me
I'll make you satisfied every night
Every night, e-e-every night, every night
Every night, e-e-every night, every night

You know I want to love you
You know I want to love you

You know I want to love you
You know I need to love you
I want you by my side every night
Girl I know you want me
The way your back upon me
I'll make you satisfied every night
Every night, every night, every night
Every night, e-e-every night, e-every night
Every night, every night, every night
