

# Love Like This

Asher Monroe

Every generation we leave behind  
Is another mountain we must climb  
We can make a better world for our children  
Stop the crying, stop polluting

It can all start with just one leap of faith  
So that together we can start making change

Even in a land of lonely people  
Dried up tears and washed up sands  
No more leaders, no more steeples  
To give us answer we demand

But with a love like this will keep us on the path to freedom  
Love like this will bring us closer, hand in hand  
A love like this will open up the hearts of many  
Love like this, a love like this

Do your best, don't settle for less  
Make your mark and pass your test  
Drown your sorrows and dry your tears

Live for reason and hide your fears

No more time that I can waste  
Holding back another day  
No more chances, no more breaks  
Seize the moment, find our way

But with a love like this will give us answers we demand  
Love like this will bring us closer, hand in hand  
A love like this will guide us to the right direction  
A love like this, love like this

Oh-oh, oh-oh, oh-oh, love like this  
Oh-oh, yeah, yeah-yeah

But with a love like this will give us answers we demand  
Love like this will bring us closer, hand in hand  
A love like this will guide us to the right direction  
A love like this, love like this
