

# Shake Weight

Asher Roth

I been tinkering, I be thinkering  
Got an inkling, where's my pinky ring, huh?  
One million dollars just ain't a lot  
Need the lottery on top of the morning, sir, bonsoir  
On a vacation raise the pay grade  
My day rate, okay, great, like GameDay on Playstation  
I'ma stay patient, I stay waiting  
For the day I can vacate this simulation  
Y'all stay hating  
Like Ray J on Kim K from Humphries to Kanye to Pete Davidson  
Wait, wait, huh? Pete Davidson?  
He say MGK date Thee Megan?  
I transform, play Sandstorm and James Bond at same time  
Some bad guy with a fake arm, but he way strong  
But he take long when making decisions  
So that's when I just hit him, bop-bop-bop-bop, are you kidding?  
Did you say you the villain, looking like you some Dylann Roof?  
Mr. Von [?]? What's it, Jake Gyllen-who?  
Best when on gin and juice, yes, approved  
But vegetables way better for you, that's the truth  
My decibels assesses Uncle Fester  
Get under your feathers when it's Asher Roth and Heather  
Better late than never, what did Drake say?  
Sweating like a wrestler to make weight  
Stay in shape, mate, get a Shake Weight, huh

Ayy wait, did somebody say "Wake and bake?"  
That's what I tend to do after I say grace  
And then I get my hustle on, can't let the day waste  
I'm fine with my body board, I don't wave chase  
That's how you end up being comfortable in eighth place  
A bunch of rappers reminiscing 'bout their heydays  
And giving bad advice on how to leverage day trades  
Watched activities, golf hats, little league  
Dad jeans jog memories about my dad, jeez  
Bad dreams, tryna be a hipster to the Gen Zs  
Gen Zs looking at millennials like, "Bitch, please"  
Hi guys, it's me, a thirty-eight year old  
Who eats acai with hemp seeds, still using the MP  
Used to whip a ten speed  
Now I'm blending coconut with ginseng  
Now I'm in the gym scene  
Asher, set the screen for the pick and pop  
Old head drove to the hoop and then his tendon popped  
That's why I stay at the perimeter  
Or in the studio, addin' limiter
