

# Autobiography

Ashlee Simpson

**Ami**            **C**

You think you know me

**F**            **D**                            **Ami**

Word on the street is that you do

**C**

You want my history

**F**            **D**                            **Ami**

What others tell you won't be true

**C**            **F**                            **D**

I walked a thousand miles while everyone was asleep

**Ami**            **C**            **F**                    **D**

Nobody's really seen my million subtleties

**Ami**            **C**            **F**                    **D**

Got stains on my t-shirt and I'm the biggest flirt

**Ami**            **C**                            **F**

Right now I'm solo, but that will be changing eventually,

**D**

oh

**Ami**            **C**            **F**                    **D**

Got bruises on my heart and sometimes I get dark

**Ami**            **C**            **F**

If you want my auto, want my autobiography

**D**            **F**            **A**

Baby, just ask me

**Ami**            **C**

I hear you talking

**F**                            **D**

Well, it's my turn now

**Ami**

I'm talking back

**C**

Look in my eyes

**F**                    **D**                            **Ami**

So you can see just where I'm at

**C**                    **F**                            **D**

I walked a thousand miles to find one river of peace

**Ami**            **C**            **F**                    **D**

I walked a million more to find what this shit means

**Ami**            **C**            **F**                    **D**

Got stains on my t-shirt and I'm the biggest flirt

**Ami**            **C**                            **F**

Right now I'm solo, but that will be changing eventually,

**D**

oh

**Ami**            **C**            **F**                    **D**

Got bruises on my heart and sometimes I get dark

**Ami**            **C**            **F**

If you want my auto, want my autobiography

**D**            **F**            **A**

Baby, just ask me

Tocar em batidas:

**Ami**            **C**            **F**                    **D**

I'm the baddest girl in this messed up world

**Ami**            **C**            **F**                    **D**

I'm the sexy girl in this crazy world

**Ami**                    **C**                    **F**                    **D**

I 'm a simple girl in a complex world

**Ami**                    **C**                    **F**                    **D**

A nasty girl, you wanna get with me?

**C**                    **F**                    **D**

You wanna mess with me?

**Ami**                    **C**                    **F**                    **D**

Got stains on my t-shirt and I 'm the biggest flirt

**Ami**                    **C**                    **F**

Right now I 'm solo, but that will be changing eventually,

**D**

oh

**Ami**                    **C**

I laugh more than I cry

**F**                    **D**

You piss me off, good-bye

**Ami**                    **C**                    **F**                    **D**

Got bruises on my heart and sometimes I get dark

**Ami**                    **C**                    **F**

If you want my auto, want my autobiography

**D**                    **F**                    **A**

Baby, just ask me
