

Gettin' Somewhere

Ashley Cooke

Already hit the main drag five times
Already put a twenty in the tank twice
Seen every mile of four-lane blacktop
Red clay chert rock tonight
Sliding over to the middle of the Chevrolet
That look you're giving me is looking like it can't wait
We got a little bit of night left, let's let these tires rest
It's getting late

We've been riding around this little town
With the windows down all night long
We've been taking our time
Doin' fifty-five in a sixty-five to the right songs
Now we got the key and the seats pulled back
I love the way you look in the neon of the dash
Might be sitting still way up on a hill
Took us all night, but I don't care
'Cause now we're gettin' somewhere

Taking curves and we ain't even rolling
Getting high and we ain't even smoking
Feels like we're kinda late to the party
'Cause now it's just getting started tonight

We've been riding around this little town
With the windows down all night long
We've been taking our time
Doin' fifty-five in a sixty-five to the right songs
Now we got the key and the seats pulled back
I love the way you look in the neon of the dash
Might be sitting still way up on a hill
Took us all night, but I don't care
'Cause now we're gettin' somewhere

Console kiss, a little steam on the tint
I hope this truck never moves again

We've been riding around this little town
With the windows down all night long
We've been taking our time
Doin' fifty-five in a sixty-five to the right songs
Now we got the key and the seats pulled back
I love the way you look in the neon of the dash
Might be sitting still way up on a hill
Took us all night, but I don't care
'Cause now we're gettin' somewhere

We've been riding around this little town
With the windows down all night long
We've been taking our time
Doin' fifty-five
