

Single At The Same Time

Ashley McBryde

It's one of them "How you been? Fill me in on you"
Small talk, a couple shots, just like we always do
I ask you how your heart is, and tell you about mine
We both laugh about the fact
That we've never crossed that line

But maybe in a another life
Or some other universe
There's a place where you and I
Found each other first
It's funny how it all works out, we're happy now
But it still crosses my mind
What could've been
If we ever would've been single at the same time

It's a shame timing ain't ever been on our side
I'm guessing if we were gonna kiss, it woulda been before tonight
But there's still those little moments when your eyes hold onto mine
And I wouldn't ask you to do nothing that would make us have to lie

But maybe in a another life
Or some other universe
There's a place you and I
Found each other first
It's funny how it all works out, we're happy now
But it still crosses my mind
What could've been
If we ever would've been single at the same time

I'm good and you're good
I'll hug you like I'm supposed to
'Cause I've got and you've got someone to get back home to

Maybe in a another life
Some other universe
There's a place you and I
Found each other first
It's funny how it all works out, we're happy now
But it still crosses my mind
What could've been
If we ever would've been single at the same time

At the same time
