

# LOVE BITE

Ashley Sienna

I'll take the danger and the pain  
It's like candy for my brain  
You know I crave it every day (Day)  
Sink your teeth into my veins

You could steal the air right out my lungs  
Phantom of the night  
And all the people screamin' I should run  
But that's just what I like

These sympathies is for you, my lover  
A whole new world I'm tempted to discover

You leave your love bites on my body, on my body  
Our love is hot and bloody, hot and bloody  
No hiding from nobody, from nobody  
I'm your baby girl, shout it to the world (Tonight)

Dressed in the moonlight  
And in your love bites  
Dressed in the moonlight  
And in your love bites

Yeah, I'll admit, I can't resist, I love the chase (Chase)  
You pull me in, I make you mine once you get a taste  
Thousand years, a thousand lies  
It's all devotion and no goodbyes (Ah)  
Give you what you fantasize  
The only way to feed your appetite

You could steal the air right out my lungs  
Phantom of the night  
And all the people screamin' I should run  
But that's just what I like

These sympathies is for you, my lover  
A whole new world I'm tempted to discover (It's right by your side)

You leave your love bites on my body, on my body  
Our love is hot and bloody, hot and bloody  
No hiding from nobody, from nobody  
You're my baby girl, shout it to the world

Dressed in the moonlight  
And in your love bites  
Dressed in the moonlight  
And in your love bites

Dressed in the moonlight  
And in your love bites  
Dressed in the moonlight (Light)  
And in your (Your) love bites
