I want to give you summer in love, I want to leave over my pain, And we will dance all the night Behind the stars and upon the moon.

And I'll wish your heart And I'll kill the pain In summer And I'll see...

It was her, tomorrow's discovery
It was her, I depend from your heart today

I want to give you summer in love, I want to leave over my pain, And we will dance all the night Behind the stars and upon the moon.

And I'll wish your heart And I'll kill the pain In summer And I'll see...

It was her, tomorrow's discovery
It was her, I depend from your heart today

For my sun
