

Dig for victory, go for gold  
I don't wanna die before I get old  
And I wonder where I'm going to  
There's some way out, there's some way through  
But I'm lost, I'm lost, I'm down again  
My direction is changing, which way,  
Which way can I go...

Get up and go

You start me up, you slow me down  
No one can deny you get around  
When you're hot, you're cold, you're in between  
Asking myself what does it mean?  
And I walk that tightrope, you should know  
I'm losing my balance, maybe,  
Maybe I should go...

Get up and go

Face to face in sympathy  
But now you turn your back on me  
Turn a card and win, but you may lose  
Fate only has that right to choose  
If you're right, leave me here, I'll die alone  
You've got the time, you've just got time  
You got the time just go...

Get up and go

Go

Just go...
