

Something New

Dum dum da-dum, dum dum da-dum, da
Dum dum da-dum, dum dum da-dum, da
Dum dum da-dum, dum dum da-dum, da-dum

I wrote all I could to this chapter, guess you couldn't read it
Lie, you lie, you lie, sayin' words, you don't mean it
Feelin' I should abandon this and just leave it, yeah

And put on a red dress, lipstick called Fever
Close down emotions, Sade on speakers
You gon' regret it, tonight, I'm gon' have to teach you (Yeah)
'Cause you tripped out, you're only thinking from waist down
I was always a real one, didn't get it first, you gon' get it now
Do you get it now? They always seem to figure out
What they have, but when it's gone
By then, it's late and I'm finished now

I think it's time for something new
I think it's time that I show you
That I got it, yeah, I got it
I still got it, you forgot it
And I think it's time for someone new

The way you used to hold her and reassure her
You ceased it, you stopped saying she's beautiful, but she needs it
You lie, you lie, you lie, so she's ready to leave it

And put on her red dress, lipstick called Fever
Close down emotions, Sade on speakers
You gon' regret it, tonight, she gon' have to teach you (Yeah)
'Cause you tripped out, you're only thinking from waist down
She was always a real one, didn't get it first, you gon' get it now
Do you get it now? They always seem to figure out
What they have, but when it's gone
By then, it's late and I'm finished now

I think it's time for something new
I think it's time that I show you
That I got it, yeah, I got it
I still got it, you forgot it
And I think it's time for someone new

The time I walk away, it's like I never stayed
And all the other times, my back, you were the blade
If I'll remain or not, you can't anticipate
You guessed it and decide to hurt me anyway, way, way
You thought I'd take the pain and stay, stay, and keep staying

But I think it's time for something new
I think it's time that I show you
That I got it, yeah, I got it
I still got it, you forgot it, oh
And I think it's time for someone new
