

I Love You Most of All (When You're Not Here)

Asleep At The Wheel

You never never never never know how much I love you
True love, is hard to quantify
Cus The time that I love you best is when you're east and I am west
And the time that I love you most is when you're on the other coast
Well you got a lot of what it takes and baby make a no mistake
I love you
I can't hide my habits from your view
So the time that I love you best is when you're east and I am west
Well I love you most of all when you're not here

Woah they say that absence makes the heart grow fonder
Well with that in mind I think it's time to wander
When my heart fills with affection when we travel in opposite directions
But when we reunite, well we're sure to fuss and fight
Well you never never never never know how much I love you
As Long as you stand next to me
But the time that I love you best is when you're east and I am west
Well I love you most of all when you're not near
I'm gonna tell you for a fact, when I leave that ol' tarmac
Well I love you more each day and miles that I'm away
Well I love you most of all when you're not here
