

## Perfectly Crystal

Asobi Seksu

softly through the air  
Angels stars surround me  
Seems like it's been forever  
Think I just need a moment  
Sorry I need reminding

I neverbeen so... trying please don't leave me behind  
We've become what we never wanted just like water and fire

... Softly beneath, I ignore all the edges aside me  
Holding myself so still, don't even feel the...  
You suddently start believing

... Nothing to see is mine. We always do what we never need to  
The worlds we built they fire

We'll fall down down down  
We'll go down down down  
We'll fall down down  
We'll go down down
