Necroceros  
Necroceros  
Necroceros

Distant singularity  
Parallel evolution  
Primordial element  
Absolute creation  
Stabilize balance  
Pre-ordained destiny  
Maintaining order  
Absorbing pure energy

Depleted clusters  
Nullified spheres  
Perpetual obliteration  
For countless light-years

Galactic encounter  
Foreboding doom  
Boosting vitality  
Orbs to consume

Engage the celestials  
Designers of stars  
Who cannot kill what doesn't live  
In aeons of war  
Titanic clash  
At last, victory proclaimed  
The menace captive  
Necroceros tamed!

Stasis cell ban  
Strength neutralized  
Molecular structure  
Immobilized

Adrift in the voids  
Then, abrupt gravitation  
Vanishing into the black hole  
Egressing the core of the sun  
Confinement systems disrupted  
The prelate of death re-released  
Mercury and Venus ravaged  
Annihilation unleashed

Requiring more sustenance  
After rebirth  
Biodiverse satellite  
Unsuspecting Earth

Initial destruction  
Chaos and plague  
Crumbling tectonic plates  
Shockwaves and quakes  
Resistance is futile  
Asphyxiating heat

The planet bursting  
As Necroceros feeds
