

Contact Left

Assuming We Survive

Contact left
I have the feeling we're surrounded, surrounded
And I don't have regrets
We're black on ammo, we don't care
Do it I dare you!
And we live or we die
We fight for each other with nobody left behind
Welcome to my family
Front, back, left, and right
(Hey, hey, hey)
One by one we say goodbye
(Hey, hey, hey)
One last look and hold on tight
I fight my tears and put this all behind
Welcome to my family
Front, back, left, and right

Gunshots ring across the sky
I hold my breath my mouth is dry
Try not to look into their eyes
I don't want these memories
And this place is a joke
There's nowhere for cover I feel so exposed
This could be my ending
Nothing safe let's stop pretending

When life's not fair and it feels like the world don't care
Just know you are not alone
We've all been scared when it feels like the world don't care
And you're caught in the crosshairs
Caught in the crosshairs

Another day another life
I feel myself losing my mind
Repeat engage just one more time
Erase these memories
But you don't want to know
I'm losing control, I want to go home
This could be my ending
Nothing safe let's stop pretending

When life's not fair and it feels like the world don't care
