

## Too Close

### Assuming We Survive

I live inside a catacomb entombed with all my fears  
I look over my shoulder catching up are all my years  
I think I'm going crazy and my mind's not thinking clear  
I wish you'd leave me tortured like I have tortured you over the years

Leave me alone I'm a walking disaster  
If I were you I wouldn't get too close  
You're better off if you go better stay clear  
The ones I love are the ones that I hurt the most

Cause it's not you it's me  
I cannot make sense of the state that I'm in  
I'm a wreck you agree  
I'm a hazard to myself and those around

I hate to show this side of me  
That no one knows I think I'm fine  
But I am damaged, I'm not fine  
Knowing that I have damaged you

Leave me alone I'm a walking disaster  
If I were you I wouldn't get too close  
You're better off if you go better stay clear  
The ones I love are the ones that I hurt the most  
Don't get too close

Lying to myself  
That I don't need your help  
I need attention

Lying to myself  
That I don't need your help  
I'm better off without it  
You'll be better off without me  
To my cell I go  
I'm better left for dead  
You're better off without me  
I'll be better off without you too

Leave me alone I'm a walking disaster  
If I were you I wouldn't get too close  
You're better off if you go better stay clear  
The ones I love are the ones that I hurt the most

Why am I afraid to face the truth  
I don't know I don't know why  
Lately I wish I was someone else  
But I'm here left to code I'm scared
